EDUCATION

Dual Degree (B.Tech + M.Tech)

Indian Institute of Technology, Kharagpur • 2023 • 7.51 CGPA

SUMMARY

Technical Product Manager with 3+ years across AI, data and enterprise SaaS, owning products from discovery to production. Built a **0 → 1 internal RAG/LangGraph platform** that cut ad-hoc analytics requests **~20% in 3 months**, and launched data-driven products that lifted **DAUs and completed jobs ~25%**. Hands-on with Python, SQL, AI prototyping, enterprise discovery and cross-functional execution.

EXPERIENCE

Product Manager | Senior Business Analyst

AiDash

April 2024 – August 2026, Gurugram

AI-powered geospatial SaaS for utilities, serving 100+ enterprise customers

- **Built a 0 → 1 RAG/LangGraph self-service analytics MVP** in Python/Streamlit with schema retrieval, SQL generation and guardrails; partnered with Engineering to productionize on Snowflake for **100+ internal users, cutting ad-hoc analytics tickets ~20% in 3 months**.
- **Identified budget constraints as an adoption barrier** through customer discovery; defined a budget-aware prioritization product with Data Science across **~20K feeders / 10 networks**, lifting **DAUs and completed jobs ~25% within 3 months and miles trimmed ~30% YoY**.
- **Productized recurring custom analytics workflows into 10+ configurable platform capabilities**; owned requirements, acceptance criteria, UAT and rollout with Engineering/Platform, expanding automation coverage from **~70% to ~80% of client projects**.
- **Redesigned a data-integration workflow** for matching utility assets across multi-year geospatial datasets; introduced multi-pass matching and configurable parameters, **improving precision by 3pp, cutting processing time ~80% and GIS contractor cost ~50%**.
- **Led discovery and solution definition across ~15 utility customers**, translating workflows and constraints into product requirements and helping convert **4 of 5 pilots into full deployments**.
- **Productized a risk-based tree-removal capability** for utilities operating under budget constraints; internal validation on one client showed **comparable reliability at ~20% lower removal budget**, supporting broader rollout across IVMS.

Senior Analyst

Indian Political Action Committee

June 2023 – April 2024, Hyderabad

- Built SQL/R/Excel reporting workflows that **cut survey report-generation time by 80%**, enabling faster turnaround for campaign teams.
- **Built and launched an alliance-simulation module** to estimate constituency-level vote share under different coalition scenarios using survey and historical data, achieving **~1% MAE** and supporting alliance strategy.
- Analyzed live survey data across **Bengal, Bihar and Andhra campaigns** using R/Excel VBA, translating voter and constituency insights into candidate strategy, campaign messaging, constituency prioritization and issue prioritization.

Product Management Intern

Analyttica Datalab

August 2022 – October 2022

- Ran an **EMI-tenure experiment** that identified preference for **3–6 month tenures** on small/mid-ticket purchases vs. **~12 months** on higher-ticket purchases, informing default-tenure recommendations.
- **User Research**: Instrumented funnel tracking across Mixpanel, Google Analytics and CleverTap and built **user personas and journey maps**.

Product & Analytics Intern

FrontRow

November 2021 – January 2022, Bangalore

- Ran **pricing and gamification experiments** using Mixpanel, Google Analytics and behavioral funnel data, reducing **bounce rate 10%**; redesigned onboarding based on user behavior, increasing **retention from 55% to 78%**.

AI PROJECTS

Locality Lens | AI Location Intelligence

locality-lens-ten.vercel.app/

- **AI Product Prototyping**: Built a location-intelligence tool using a stateful LangGraph agent with dual-LLM routing and **REST API integrations to fetch POIs around user-defined coordinates**, balancing latency, answer quality and grounded recommendations.

RAG Document QA System

rag-document-qa-navy.vercel.app/

- **AI Evaluation & RAG**: Built and deployed a RAG QA system with hybrid retrieval (dense + BM25/RRF), multi-turn Q&A and evaluation workflows to identify retrieval and answer-quality failure modes and improve grounding.

SKILLS

Product: Product Discovery, Product Strategy, Roadmaps, PRDs, Requirements, Prioritization, KPI Definition, Enterprise Customer Discovery, Product Analytics, Experimentation, UAT

AI & Data Products: GenAI, LLM Applications, RAG, AI Agents, LangGraph, Prompt Design, Guardrails, AI Evaluation, Workflow Automation

Technical & Analytics: SQL, Python, Snowflake, AWS, FastAPI, REST APIs, API Integrations, Docker, Git, Jira, Mixpanel, Tableau
