SUMMARY

Product professional with 3+ years of experience bridging data, engineering, and business strategy in AI SaaS and digital platforms. Proven track record of owning end-to-end product lifecycles — from writing PRDs and defining KPIs to shipping features and measuring impact. Experienced in driving A/B experimentation, user funnel optimization, and cross-functional collaboration with engineering teams in lean, fast-paced environment. Strong technical fluency in SQL, Python, and analytics tools; adept at translating ambiguous problems into clear, actionable roadmaps.

EXPERIENCE

Senior Product & Business Analyst

AiDash

April 2024 - Present, Gurugram

- Own roadmap, PRDs, and success metrics for AI-powered geospatial modules serving 20 utility enterprises across the globe (\$10M ARR) — converted 4 of 5 enterprise pilots to production deployments and shipped 10+ features adopted across 50 client projects.
- Shipped the vegetation risk-and-prioritization capability end-to-end — scored area-level risk, then ranked circuits by ROI so utilities could direct fixed trim budgets to highest-return segments first; cut client vegetation-management cost 12% and reduced outage frequency (SAIFI) by 5%.
- Led enhancement of the Hazard Tree Management module for budget-constrained utilities — scoped requirements and applied clustering-based hotspot analysis to surface individual high-risk trees, letting clients hit reliability targets on minimal spend; cut vegetation-removal cost 20%.
- Standardized delivery workflows, introduced automation and redesigned YoY correlation pipeline, improving network correlation accuracy by 15% and reducing project turnaround time by 45% — demonstrating ability to manage projects and bring clarity to ambiguous processes.
- Launched an org-wide LLM self-service analytics platform (RAG + LangGraph) enabling 100 non-technical users across CS and ops to query product data without SQL/BI.

Senior Analyst

Indian Political Action Committee

June 2023 - April 2024, Hyderabad

- Analyzed a live stream of survey data (R, Excel VBA) to surface voter-behavior trends that directly informed 3 key campaign decisions.
- Built SQL/R/Excel reporting workflows that cut survey report-generation time by 80%.
- Investigated 5 West Bengal elections across 1M data points (Python, Tableau, QGIS), achieving 1% MAE in vote-share projection to drive strategy.

Product Management Intern

Analyttica Datalab

August 2022 - October 2022

- Administered a controlled field experiment (A/B Test) to identify the Customer EMI Preference by formulating an effective hypothesis.
- Instrumented funnel tracking across Mixpanel, Google Analytics, and CleverTap and built user personas and journey maps.

Product Intern

Verdis

May 2022 - July 2022

- Built a demand-forecasting model (Random Forest, XGBoost, Prophet) with social/news sentiment signals (VADER), reducing forecast MAE to 7%.
- Established baseline supply calculations across SLAs, factoring shelf life, lead time, wastage, and unmet demand.

PROJECT

RAG Document QA System

AI-Powered Document QA Platform • github.com/nitishhranjan/rag-document-qa-basic

- Shipped a production RAG system end-to-end (idea → build → deploy) with hybrid retrieval (dense vector + BM25, RRF fusion) and multi-turn Q&A via LLM-based question condensation — served on AWS EC2 via Docker.
- Owned the full loop: scoped the use case, designed the retrieval experience, and resolved production OOM constraints to ship a stable tool.

SKILLS

Product Management: Product Strategy, Roadmap Prioritization, Product Discovery, PRD Writing, User Research, Stakeholder Management, KPI / Metric Definition, User Personas & Journey Mapping

Experimentation: A/B Testing, Experiment Design, Hypothesis Testing, Funnel & Cohort Analysis, Retention Analysis, Causal Inference

Product Analytics: Amplitude, Pendo, Mixpanel, Google Analytics, CleverTap

Data & Tools: SQL, Snowflake, Python (pandas, NumPy), R, Tableau, QGIS, Advanced Excel, AWS, Docker, FastAPI, Jira, Git

AI / LLM & Deployment: RAG, LLM Agents, LangChain, LangGraph, Prompt Engineering, Hybrid Retrieval (BM25 + Vector)

EDUCATION

Mining Engineering

Indian Institute of Technology, Kharagpur • West Bengal, India • 2023 • 7.51 CGPA
