

Nitish Ranjan

AI / Technical Product Manager | GenAI, RAG, Enterprise SaaS, Data Products

ranjannitish30@gmail.com | +91-9911651252 | LinkedIn: ranjan-nitish | Portfolio

SUMMARY

Technical Product Manager with 3+ years across AI, data and enterprise SaaS, owning products from discovery to production. Built a **0 to 1 internal RAG/LangGraph platform** that cut ad-hoc analytics requests **~20% in 3 months**, and launched data-driven products that lifted **DAUs and completed jobs ~25%**. Hands-on with Python, SQL, AI prototyping, enterprise discovery and cross-functional execution.

EXPERIENCE

AiDash | Technical Product Manager | Senior Business Analyst

Apr 2024 - Aug 2026 | Gurugram

AI-powered geospatial SaaS; IVMS serves 100+ external utility customers.

- Built a **0 to 1 RAG/LangGraph self-service analytics MVP** in Python/Streamlit with schema retrieval, SQL generation and guardrails; partnered with Engineering to productionize on Snowflake for **100+ internal users, cutting ad-hoc analytics tickets ~20% in 3 months**.
- **Identified budget constraints as an adoption barrier** through customer discovery; defined a budget-aware prioritization product with Data Science across **~20K feeders / 10 networks**, lifting **DAUs and completed jobs ~25% within 3 months and miles trimmed ~30% YoY**.
- **Productized recurring custom analytics workflows into 10+ configurable platform capabilities**; owned requirements, acceptance criteria, UAT and rollout with Engineering/Platform, expanding automation coverage from **~70% to ~80% of client projects**.
- **Redesigned a data-integration workflow** for matching utility assets across multi-year geospatial datasets; introduced multi-pass matching and configurable parameters, **improving precision by 3pp, cutting processing time ~80% and GIS contractor cost ~50%**.
- **Led discovery and solution definition across ~15 utility customers**, translating workflows and constraints into product requirements and helping convert **4 of 5 pilots into full deployments**.

Indian Political Action Committee | Senior Analyst

Jun 2023 - Apr 2024 | Hyderabad

- Built SQL/R/Excel reporting workflows that cut report-generation time **80%**, enabling faster decision-making for campaign teams.
- Built an alliance-simulation module using survey and historical data to estimate constituency-level outcomes across coalition scenarios, achieving **~1% MAE**.

Analytica Datalab | Product Management Intern

Aug 2022 - Oct 2022

- Ran an EMI-tenure experiment identifying preference for **3-6 month tenures** on small/mid-ticket purchases vs. **~12 months** on higher-ticket purchases, informing default-tenure recommendations.

FrontRow | Product & Analytics Intern

Nov 2021 - Jan 2022 | Bengaluru

- Ran pricing and gamification experiments using behavioral funnel data, reducing **bounce rate 10%**; redesigned onboarding based on user behavior, improving **retention from 55% to 78%**.

AI PROJECTS

RAG Document QA System | rag-document-qa-navy.vercel.app

- Built and deployed a RAG QA system with **hybrid retrieval (dense + BM25/RRF)**, multi-turn Q&A and evaluation workflows to diagnose retrieval/answer failures and improve grounding.

Locality Lens | AI Location Intelligence | locality-lens-ten.vercel.app

- Built a **LangGraph location-intelligence agent** with dual-LLM routing and REST API integrations to fetch POIs around user-defined coordinates, balancing latency, answer quality and grounded recommendations.

SKILLS

Product: Product Discovery, Product Strategy, Roadmaps, PRDs, Requirements, Prioritization, KPI Definition, Enterprise Customer Discovery, Product Analytics, Experimentation, UAT

AI & Data Products: GenAI, LLM Applications, RAG, AI Agents, LangGraph, Prompt Design, Guardrails, AI Evaluation, Self-Service Analytics, Workflow Automation

Technical & Analytics: SQL, Python, Snowflake, AWS, FastAPI, REST APIs, API Integrations, Docker, Git, Mixpanel, Tableau

EDUCATION

Indian Institute of Technology, Kharagpur

Dual Degree (B.Tech + M.Tech), Mining Engineering | 2023 | CGPA: 7.51/10
